

Health & Safety Policy Statement

The following is a statement of the organisation's Health & Safety Policy in accordance with Section 2 of the Health & Safety at Work Act 1974.

It is the policy of DJT Surfacing Ltd to ensure so far as is reasonably practicable, the health, safety and welfare of all Employees working for the Company and other persons who may be affected by our undertakings.

DJT Surfacing Ltd acknowledges that the key to successful Health & Safety management requires an effective policy, organisation and arrangements, which reflect the commitment of senior management. To maintain that commitment, we will continually measure, monitor and revise where necessary our annual plan to ensure that Health & Safety standards are adequately maintained.

We will implement the company's Health & Safety policy and recommend any changes to meet new circumstances. DJT Surfacing Ltd recognises that successful Health & Safety management contributes to successful business performance and will allocate adequate capital and resources to meet these requirements.

The management of DJT Surfacing Ltd looks upon the promotion of Health & Safety measures as a mutual objective for themselves and Employees. It is, therefore, the policy of management to do all that is reasonably practicable to prevent personal injury and damage to property. The organisation also aims to protect everyone, including visitors and members of the public, insofar as they come into contact with our activities, from any foreseeable hazards or danger.

All Employees have duties under the Health & Safety at Work Act 1974 and are informed of their personal responsibilities to take due care of the Health & Safety of themselves and to ensure that they do not endanger others by their acts or omissions. Employees are also informed that they must co-operate with the organisation in order that it can comply with legal requirements placed upon it and in the implementation of this policy. DJT Surfacing Ltd will ensure continued consultation with the Workforce to enable all viewpoints and recommendations to be discussed at regular intervals.

The organisation will ensure a systematic approach to identifying hazards, assessing the risks, determining suitable and sufficient control measures and informing Employees of the correct procedures needed to maintain a safe working environment.

We will provide, so far as is reasonably practicable, safe places and systems of work, safe plant and machinery, safe handling of materials and substances, the provision of adequate safety equipment and ensure that appropriate information, instruction, training and supervision is given.

We regard all Health & Safety legislation as the minimum standard and expect management to achieve their target without compromising Health & Safety.

Mike Archer
